All statements in this document other than statements of historical facts, including statements regarding our future results of operations and financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. When used, statements which are not historical in nature, including those containing words such as "anticipate," "estimate," "should," "expect," "believe," "intend," and similar expressions, are intended to identify forward-looking statements. Interest Rate Sensitivity Analysis

- The management team seeks the optimization of Fixed versus Variable rate leverage based upon the current and projected interest rate market.
- The sensitivity analysis represents the change over the next 12 months assuming an immediate shift in rates and management does not adjust its strategy in response.
- The seniority of the Preferred Units further reduces impact from changes in interest rates.

Please Note:

- The interest rate sensitivity table above (the "Table") represents the change in interest income from investments, net of interest on debt and settlement payments for interest rate derivatives over the next twelve months, assuming an immediate parallel shift in the LIBOR yield curve and the resulting implied forward rates are realized as a component of this shift in the curve. Assumptions include anticipated interest rates, relationships between interest rate indices and outstanding investments, liabilities and interest rate derivative positions.
- No assurance can be made that the assumptions included in the Table presented herein will occur or that other events will not occur that will affect the outcomes of the analysis. Furthermore, the results included in the Table assume the Partnership does not act to change its sensitivity to the movement in interest rates.
- As the above information incorporates only those material positions or exposures that existed as of December 31, 2022, it does not consider those exposures or positions that could arise after that date. The ultimate economic impact of these market risks will depend on the exposures that arise during the period, our risk mitigation strategies at that time and the overall business and economic environment.
- "Per BUC Impact" - The net interest income change per BUC calculated based on 22,538,878 BUCs outstanding as of January 31, 2023.

Addendum C

Cash Available for Distribution Calculation

The Partnership believes that Cash Available for Distribution ("CAD") provides relevant information about the Partnership's operations and is necessary, along with net income, for understanding its operating results. To calculate CAD, the Partnership begins with net income as computed in accordance with GAAP and adjusts for non-cash expenses consisting of depreciation expense, amortization expense related to deferred financing costs, amortization of premiums and discounts, non-cash interest rate derivative expense or income, provisions for credit and loan losses, impairments on MRBs, governmental issuer loans, Public housing Capital Fund Trust Certificates, real estate assets and property loans, deferred income tax expense (benefit) and restricted unit compensation expense. The Partnership also deducts Tier 2 income allocable to the General Partner as defined in the Partnership Agreement and distributions and accretion for the Preferred Units. Net income is the GAAP measure most comparable to CAD. There is no generally accepted methodology for computing CAD, and the Partnership's computation of CAD may not be comparable to CAD reported by other companies. Although the Partnership considers CAD to be a useful measure of the Partnership's operating performance, CAD is a non-GAAP measure that should not be considered as an alternative to net income calculated in accordance with GAAP, or any other measures of financial performance presented in accordance with GAAP. The following table shows the calculation of CAD (and a reconciliation of the Partnership's net income, as determined in accordance with GAAP, to CAD) for the years ended December 31, 2022, 2021, 2020, 2019, 2018, 2017 and 2016.
